

Communication

Date	13 July 2026
Team ID	AIML-HDI-2026
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Communication Plan

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Comm. Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Sync	Daily	WhatsApp / Google Meet	Both Members	Discuss daily tasks (data prep, model training, deployment), identify blockers, and align on next steps.
2	Progress Update	Weekly	GitHub / Email	Both Members	Track phase progress, review documentation updates, and share training/evaluation milestones.
3	Issue / Bug Discussion	As Needed	WhatsApp / GitHub Issues	Both Members	Quick collaboration to resolve Flask routing errors, model-loading errors, or scaling mismatches.
4	Model Hand-off Review	Once	Google Meet	Both Members	Review the trained model (Nimmakayala Venkata Satheesh Kumar) against the Flask integration requirements (Cherukuri Sailaja Kiranmai) before deployment.
5	Final Demo Rehearsal	Once	Google Meet	Both Members	Practice the final project walkthrough, test hdi-webapp.onrender.com end-to-end, and prepare the presentation notes.

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Scheduling syncs: conflicting schedules made it difficult to host synchronous daily meetings.	Shifted to asynchronous updates using a shared WhatsApp thread where each member posted short end-of-day summaries.
2	Model/backend mismatch: the trained model's expected input features (13 total, including historical HDI columns) weren't obvious from the pickle file alone.	Nimmakayala Venkata Satheesh Kumar and Cherukuri Sailaja Kiranmai held a short screen-share session to trace the exact feature order back to the original notebook code before wiring up the Flask app.
3	Version control conflicts: both members editing app.py and the templates around the same time led to merge conflicts.	Adopted a rule to announce which file was being edited in the group chat, and to commit small, frequent changes rather than large batches.
