

Customer Journey Map

Date	07 July 2026
Team ID	AIML-HDI-2026
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions	User opens the LocalTunnel-hosted web dashboard and enters Life Expectancy, Expected Years of Schooling, and GNI per capita.	User submits the form; the hybrid neural network processes the scaled inputs through the primary and secondary branches and returns a prediction.	User reviews the predicted HDI score and colour-coded development tier, then adjusts values to explore what-if scenarios.
Touchpoint	Web dashboard URL / HTML input form.	Flask inference backend / model forward pass.	Web browser results panel / tier benchmark table.
Customer Thought	"This is a simple form — no installation needed."	"That was fast — the model handled the calculation instantly."	"This prediction helps justify our next planning decision."
Customer Feeling	Relieved by the accessibility.	Engaged and reassured by the speed.	Confident and empowered.
Process Ownership	Frontend / Deployment — Nimmakayala Venkata Satheesh Kumar.	Machine Learning — Nimmakayala Venkata Satheesh Kumar.	Documentation & Monitoring — Cherukuri Sailaja Kiranmai.
Opportunities to Improve	Add input-range hints to prevent invalid values on the web form.	Surface which indicator most influenced the prediction (explainability).	Add an export/download option for the predicted result.
